Doncaster Community Solutions reaches financial close

Community Solutions for Primary Care (CSPC), a Morgan Sindall Investments Limited joint-venture company, is pleased to announce that it has achieved financial close on four modern health centre developments as part of their NHS LIFT project.

In September 2005, Doncaster Community Solutions (LIFTCo) Limited (DCS) signed a 20 year partnering agreement to build and maintain a network of new health and social care premises in the Doncaster area. DCS was formed by Doncaster's three Primary Care Trusts, Doncaster Metropolitan Borough Council, Partnerships for Health and CSPC as a Public Private Partnership company.

Construction of the four health centres in Moorends, Hatfield, Edlington and Askem will start at the end of October and the centres are due to open in June, September, October and December 2008 respectively, adding to the three fully operational Health Centres already open to the public on Thome, Sandrigham Road and Denaby.
